SUMMARY

Full-stack engineer who builds agentic AI end-to-end — from a React/TypeScript front end through a FastAPI/Django REST backend down to the LangGraph agent layer and the tools it calls. I ship production systems: MCP servers in real client workflows, multi-agent LangGraph pipelines in enterprise R&D, and full-stack platforms delivered to paying clients on compressed timelines. The rare part is I don't stop at the model — I own the whole surface an agent lives in, from the UI a user touches to the orchestration state machine driving multi-turn behavior — exactly what an experience-orchestration product needs.

EXPERIENCE

Freelance AI Engineer & Full-Stack Developer

Remote

WorldCovers / APMC

- May 2026 – Present
- Built and shipped features on the **WorldCovers** production platform: **React/TypeScript** front end, **Django REST** backend, **14-table PostgreSQL** schema.
- Delivered features and automation to a live client under compressed timelines, coordinating scope with stakeholders.
- Practiced AI-augmented engineering (Claude Code) to compress delivery without losing correctness.

Software Associate

Remote

Cognizant

- December 2025 – Present
- Build GenAI and agentic AI systems using **LangChain, LangGraph, and Python** across R&D and client deliverables.
- Ship **RAG pipelines** and **MCP server integrations** into production workflows.
- Scope, prototype, and deliver AI data tools cross-functionally.

GenAI Developer Contractor

Remote

Cognizant

- June 2025 – December 2025
- Built GenAI POCs with **LangChain / LangGraph / Python**; owned prompt engineering and model evaluation.
- Built **custom FastMCP servers** and integrated external **MCP** services with **AWS** for dynamic agent tool access — standardizing tool access platform-wide.

IT Student Helper

James Rumsey Technical Institute

- 2019 – 2021
- Resolved **300+ support tickets**; led a Wi-Fi overhaul that cut latency **25%**; completed **100+** AV/network setups.

PROJECTS

CFO Agent — full-stack agentic financial assistant (in active development)

Python, FastAPI, LangGraph, PostgreSQL, Redis, Anthropic API

- FastAPI + **LangGraph** agent with **PostgreSQL** persistence and **Redis** caching; financial data via CSV/OFX import + encrypted vault.
- Hybrid context architecture; multi-tenant-ready design.

CreatorClip / autclip.studio — full-stack live SaaS (Stripe billing)

React/TypeScript, Python, FastAPI, Celery, pgvector, WhisperX, Voyage AI, Anthropic API, ffmpeg, YouTube OAuth

- Async **Celery** pipeline: **WhisperX** transcription, **Voyage + pgvector** embeddings, **ffmpeg** rendering.
- Creator-"DNA" style-matching module; **YouTube OAuth**; **CI auto-deploys to prod on push to main**.

Agentic Software Development Team — Cognizant R&D

LangChain, LangGraph, Amazon Bedrock

- Multi-agent **LangGraph** system (codegen / testing / security / supervision agents) on **Bedrock** + OSS ML backends.

Customer Call Data Analysis & Insights Engine — Cognizant R&D

Python, NLP, Sentence Transformers

- NLP clustering of call data into semantic issue groups; agentic AI for call consolidation and executive reporting. (*Contact-center-adjacent.*)

TECHNICAL SKILLS

Languages: Python, SQL

Frontend: React / TypeScript

Backend / APIs: FastAPI, Django REST

Agentic / LLM: LangChain, LangGraph, RAG, MCP Servers, Amazon Bedrock, Anthropic API, Sentence Transformers, pgvector

Data / Infra: PostgreSQL, Redis, Celery, Docker, TensorFlow, Pandas, NumPy

Platforms / Tools: Linux, Ubuntu, Git, GitHub, Azure Fundamentals, AWS, VS Code, Claude Code, Jupyter

CERTIFICATIONS

TensorFlow Developer Specialization · Linux + Git (Boot.dev) · AZ-900 (Azure Fundamentals) · GitHub Copilot · Generative AI Context Engineering (Cognizant)

EDUCATION

B.S. Computer Science — Shepherd University (Major GPA 3.43), Aug 2021 – May 2025
