Summary

Hands-on AI engineer who builds production agent systems 0→1, solo — architecture through deployment: copilots, autonomous agents, multi-agent LangGraph teams, custom MCP servers for dynamic agent tool access, and full-stack agentic products. Own the whole slice — orchestration, RAG, backend, data, infra. Azure Fundamentals (AZ-900) certified; stack-agnostic architecture ramps fast into Microsoft/Azure.

Skills

Cloud / Microsoft ecosystem: Azure Fundamentals (AZ-900, certified), Azure concepts; Amazon Bedrock, AWS infra **Agentic AI:** LangGraph (multi-agent orchestration), LangChain, MCP servers (FastMCP + external integrations), RAG pipelines, agent tool-calling, prompt engineering, model evaluation **Languages / Data:** Python, SQL, PostgreSQL, pgvector, Redis, Pandas, NumPy | **ML / NLP:** Sentence Transformers, TensorFlow, Voyage AI + Anthropic APIs, semantic clustering **Backend / Infra:** FastAPI, Celery, Docker, Django REST, Linux/Ubuntu, Git/GitHub | **Frontend:** React / TypeScript | **Tooling:** Claude Code, VS Code, Jupyter, ffmpeg, WhisperX

Experience

Software Associate — Cognizant (Remote)

Dec 2025 – Present - Build/maintain GenAI and agentic systems (LangChain, LangGraph, Python) for R&D and client deliverables. - Design RAG pipelines and MCP server integrations connecting enterprise tools to LLMs in production. - Scope, prototype, and deliver AI data-analysis tools with cross-functional teams.

Freelance AI Engineer & Full-Stack Developer — Independent Contract (WorldCovers / APMC) (Remote)

May 2026 – Present - Paid contract engineer on production web properties and the WorldCovers philatelic cataloging platform. - Ship features/automation on a 14-table PostgreSQL schema, Django REST backend, React/TypeScript frontend. - AI-augmented delivery (Claude Code) shipping production work on compressed timelines, direct with stakeholders.

GenAI Developer Contractor — Cognizant (Remote)

Jun 2025 – Dec 2025 - Built GenAI POCs (LangChain/LangGraph/Python) accelerating agentic adoption; prompt engineering + model eval. - Built custom FastMCP servers + external MCP integrations on AWS for dynamic, production-style agent tool access.

IT Student Helper — James Rumsey Tech

Aug 2019 – May 2021 - Resolved 300+ tickets; led a Wi-Fi overhaul cutting latency 25%; completed 100+ AV/network setups.

Projects

CFO Agent — built from the ground up (in active development)

Python, FastAPI, LangGraph, PostgreSQL, Redis, Anthropic API - Personal-finance AI agent 0→1: FastAPI + LangGraph backend, PostgreSQL persistence, Redis cache, CSV/OFX import + encrypted vault. - Hybrid context architecture (auto aggregation + manual “vault”); architected for multi-tenant productization.

Agentic Software Development Team — built from the ground up (Cognizant R&D)

Python, LangChain, LangGraph, Amazon Bedrock - Multi-agent LangGraph system (codegen, testing, security review, supervision) automating the full build lifecycle. - Backed by Amazon Bedrock plus open-source ML inference — a from-scratch automated engineering workflow.

CreatorClip / autclip.studio

Python, FastAPI, Celery, pgvector, WhisperX, Voyage AI, Anthropic API, ffmpeg, YouTube OAuth - Live SaaS I built solo: Stripe billing, CI/CD, ~79% coverage; learns creator style via a custom “DNA” module. - Async Celery: WhisperX transcription, Voyage + pgvector embeddings, ffmpeg rendering; full YouTube OAuth.

Customer Call Data Analysis & Insights Engine (Cognizant R&D)

Python, NLP, Sentence Transformers - NLP clustering into semantic issue groups; agentic AI for call-consolidation patterns and executive reporting.

Education

BS Computer Science — Shepherd University, Aug 2021 – May 2025 (major GPA 3.43)

Certifications

- Azure Fundamentals (AZ-900) | TensorFlow Developer Specialization (DeepLearning.ai) | Linux + Git (Boot.dev) | GitHub Copilot | Generative AI Context Engineering (Cognizant)
